Income Taxes

Our effective income tax rates for the second quarter of 2019 and 2018 of 18.2% and 21.5%, respectively, are influenced by non-recurring, other unusual and non-operating pension and OPEB items (see Non-GAAP Reconciliations). The decrease in the effective tax rate in the second quarter of 2019 compared to 2018 was impacted by a variety of factors, primarily stemming from a change in the geographic mix of earnings. Our adjusted effective income tax rates, which exclude non-recurring, other unusual and non-operating pension and OPEB items, were 18.4% and 24.4% for the second quarter of 2019 and 2018, respectively, and continue to be influenced by the level and geographic mix of income.

Cash Flow

Our cash from operations was approximately \$199.3 million for the six months ended June 30, 2019, a decrease of \$24.6 million versus the same period in 2018, primarily due to increased inventory purchases to meet higher forecasted sales, the timing on collection of certain receivables, lower cash earnings in our Catalysts reportable segment and higher cash taxes paid. These were partially offset by higher dividends received from unconsolidated investments and increased cash earnings from Bromine Specialties. Capital expenditures were \$415.6 million as compared to \$280.9 million in the first six months of 2018, with the increase driven largely by expansion in our Lithium business.

We had \$398.2 million in cash and cash equivalents at June 30, 2019, as compared to \$555.3 million at December 31, 2018. During the first six months of 2019, cash on hand, cash provided by operations and commercial paper note borrowings funded dividends to shareholders of \$74.3 million, in addition to capital expenditures.

Additional Information

It should be noted that adjusted net income attributable to Albemarle Corporation, adjusted diluted earnings per share, non-operating pension and OPEB items per diluted share, non-recurring and other unusual items per diluted share, adjusted effective income tax rates, EBITDA, adjusted EBITDA, EBITDA margin and adjusted EBITDA margin are financial measures that are not required by, or presented in accordance with, accounting principles generally accepted in the United States, or GAAP. These non-GAAP measures should not be considered as alternatives to Net income attributable to Albemarle Corporation ("earnings"). These measures are presented here to provide additional useful measurements to review our operations, provide transparency to investors and enable period-to-period comparability of financial performance. The Company's chief operating decision maker uses these measures to assess the ongoing performance of the Company and its segments, as well as for business and enterprise planning purposes.

A description of other non-GAAP financial measures that we use to evaluate our operations and financial performance, and reconciliation of these non-GAAP financial measures to the most directly comparable financial measures calculated and reported in accordance with GAAP can be found on the following pages of this press release, which is also posted in the Investors section of our website at www.albemarle.com. The Company does not provide a reconciliation of forward-looking non-GAAP financial measures to the most directly comparable financial measures calculated and reported in accordance with GAAP, as the Company is unable to estimate significant non-recurring or unusual items without unreasonable effort. The amounts and timing of these items are uncertain and could be material to the Company's results calculated in accordance with GAAP.
